

ISblue Thème 1 day -- 18th december 2025 -- preliminary programme

début	fin	Session	Modérateur	Intervenant	Titre de la présentation
8h30	9h00	Accueil			Café d'accueil
9h00	10h30	AM1	Jill	Theme 1 board	Short introduction from the Theme 1 coordinators
9h15		AM1	Jill	Nicolas Djegheri	Summerification-Autumnification” of northeast Atlantic plankton seasonal succession under climate change
9h30		AM1	Jill	Marc Long	Marine SNOW formation: unveiling the mechanisms of the alleloPATHic shuttle.
9h45		AM1	Jill	Maeva Gesson	Exploring oceanic glues within the MORPHEUS Project: how their diversity could influences carbon storage?
10h00		AM1	Jill	Jordan Toulec	Daily Light dose effect on Arctic Diatoms Aggregation
10h15		AM1	Jill	Johann Lavaud	ARDCO_Arctic
10h30	11h00	Pause			Pause-café
11h00	12h30	AM2	Fred	Helene Planquette	SWINGS: South West Indian Geotraces Section
11h15		AM2	Fred	Emilie Leroy	Heard and McDonald Islands (Kerguelen Plateau): Insights into Fertilization Sources in the Southern Ocean
11h30		AM2	Fred	Gabriel Dulaquais	ETOOAL
11h45		AM2	Fred	Anne Lorrain	Comment l'Azote dérivé des Oiseaux marins influence le cycle de l'azote des récifs coralliens au cours du temps
12h00		AM2	Fred	Jill Sutton	The influence of temperature on silicon isotope fractionation by sponges
12h15		AM2	Fred	Anne Gaymard	Towards the Representation of Microplastic-Biogeochemical Interactions in a Global Coupled Model
12h30	14h00	Repas			Buffet
14h00	15h00	PM1	Antoine	Anastasia Volorio-Galéa	Submesocale Fronts Dynamics and Primary Production from Space - SWOT satellite mission
14h15		PM1	Antoine	Ricardo Silva Jacinto	A morphological control of dense water overflow downstream the Denmark Strait? Contribution to the Far-Dwo project and oceanographic cruise
14h30		PM1	Antoine	Anatole Gros-Martial	Detection and estimation of precipitation in the Southern Ocean using bio-logged elephant seals
14h45		PM1	Antoine	Matthis Auger	Observing the transport of water masses at the Antarctic margins from space
15h00	15h30	Pause			Pause-café
15h30	16h45	PM2	Antoine	Théophile Caby	Dynamic properties of sea level extremes
15h45		PM1	Antoine	Gema Camacho Viteri	First insights from CROSSROAD cruise 2024
16h00		PM2	Antoine	Jonathan Gula	Deep ocean currents around a contouritic ridge in the Mozambique Channel
16h15		PM2	Antoine	Pierre-Amaël Auger	Characterization of the Hydrodynamic Functioning of a Coastal Bay under the Influence of Coastal Upwelling (Hann Bay, Dakar, Senegal)
16h30		PM2	Antoine	Noureddine Latrache	Quantification des bulles électrolytiques pour le contrôle des écoulements et des vibrations induites des structures marines.
16h45		PM2			Final words
